Continued Professional Development (CPD) is about developing professional skills and practice.

Not retaining talent is bad for business.

- 78% of companies are losing talent due to a lack of growth opportunities.
- 40% of people are planning to leave their current employer.
- On average, it costs anywhere from half to two times an employee's annual salary to find a new person.

By providing your employees with access to a library of relevant and practical CPD, you will demonstrate your commitment to these individuals, boosting their skills and employee retention.

“The single biggest driver of business impact is the strength of an organisation’s learning culture.” — Josh Bersin, global HR & L&D analyst
